NAUTEK SC200
NEW FIRMWARE UPGRADE 2.3
MORE TACTICAL FEATURES AVAILABLE!

Upgrade the firmware of your NAUTEK SC Speedo Compass : use the benefits of a more intuitive user interface and of new advanced tactical features!

New SPEED / VMG* / VTD* Trend information:

New trend information, check more easily if you are sailing faster or slower than during the averaged last 10 seconds.

Start line: Take a better start using the display of the distance to the starting line in user programmable lengths of boat and using the favored end of line calculation.*

Race marks on triangular races : Let your SC200 calculate the position of the windward mark with the Direction and Distance information given by the race committee vessel.

Use the benefits of the Velocity to marks VTD - VTDu when sailing upwind - VTDD when sailing downwind and of the Direction to the current mark BUP/BDOWN .

Stop missing the upwind and downwind laylines*.

Shoot the windward and leeward marks to get even more accurate information*.

RACE SCREEN MODE : New setting and user interface really more intuitive*.

Auto-suggestion of True Wind Dir value : Only one button press shortcut to use to correct automatically the True Wind Dir value when sailing windward on one tack*.

WAYPOINTS SCREEN MODE : Don't hesitate no more when sailing long distance racing thanks to the new DIRECTION TO WAYPOINT graphical information which gives you an intuitive display about the position of the next waypoint in GOTO or ROUTE mode.

Set now your waypoint as to let starboard, to let port or to sail into a gate.

LIVE NMEA OUTPUT: Connect directly via its USB cable your GPS SC device to your preferred PC navigation software for live tracking on your boat.

* : SC200 only

The NAUTEK suite PC software : the new "all in one" free software to deal with your SC device!

Only one software to use in order to download your recorded GPS tracks, manage your waypoints and routes files and upgrade the features of your SC Speedo Compass device with the most up-to-date firmware.

Use the benefits of the new SC Configuration panel** to fix the settings of your SC Speedo Compass device.

** : For Windows XP and VISTA only.
